

RECOGNITION

The five degrees or specialities of Higher Education in our institution have a total of 2000 hours of formation taught in two academic courses. The hours of obligatory formation in Work Placements (Traineeships) are included in them.

The Education Spanish Law of Vocational Education Non-University Higher Education recognizes a total of 120 ECTS for every completed degree. The Decrees that develop every speciality of Vocational Education indicate the ECTS for the different subjects. The five Decrees are showed in our web.

The period of Traineeships is compulsory for all students and it only might be realized when the rest of subjects have been passed. This way, students have acquired the knowledge and done the own activities of their qualifications before this latter phase.

During the traineeships, the students are guided by a job supervisor, who takes responsibility of them every day in the working place, and an educational tutor, who is in touch with the labor tutor and the students to monitor and to verify that the functions that develop are the own ones of the degree. The mark obtained in this subject is suitable or not suitable and, finally, is decided by the educational tutor.
